SEAT No. : $\square$
[Total No. of Pages : 4

Time: 2½ Hours]
[Max. Marks : 70
Instructions to the candidates:

1) Answer Q. 1 or Q.2, Q. 3 or Q.4, Q. 5 or Q.6, Q. 7 or Q.8.
2) Neat diagrams must be drawn wherever necessary.
3) Figures to the right indicate full marks.
4) Use of calculator is allowed.
5) Assume suitable data, if necessary.

Q1) a) $\begin{gathered}\text { The following marks have been obtained by a class of students in } 2\end{gathered}$ papers of mathematics.

| Paper I | 45 | 55 | 56 | 50 | 60 | 65 | 68 | 70 | 75 | 80 | 85 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Paper II | 56 | 50 | 48 | 60 | 68 | 64 | 65 | 70 | 74 | 82 | 90 |

Calculate the coefficient of correlation for the above data.
b) Find the quartile deviation and coefficient of quartile deviation of the following frequency distribution.

| Marks | $\leqslant 10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Students | $\times 10$ | 20 | 30 | 50 | 40 | 30 |

OR
Q2) a) Determine the eq ${ }^{\text {ns }}$ of regression lines for the following data. Also find the value of (i) $y$ for $x=4.5$ (ii) $x$ when $y=13$

| $x$ | 2 | 3 | 5 | 7 | 9 | 10 | 12 | 15 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $y$ | 2 | 5 | 8 | 10 | 12 | 14 | 15 | 16 |

b) The first four moments of four distribution about the value 4 are 2,20, 40 and 100 respectively.
i) Obtain the first central moments
ii) Find mean, standard deviation
iii) Find coefficients of skewness and kurtosis

Q3) a) In a certain company install 2000 DED bulbs on each floor. If LED bulbs have average life of 1000 barning hours with standard deviation of 200 hours. Using normal distribution find what number of LED bulbs might be expected to Faur in 700 hours.
(Given : $\mathrm{P}(0<\mathrm{z}<1.5)=0.4332$ )
b) Between 2 pm to 4 pmithe average no of phone calls per minute coming into asvitch board of a company is 2.5 . Find the probability that during a particular minute there will be
i) no phone calb
ii) exacty 3 phone calls
c) A dice is thrown 10 times. If getting an odd number is a success. What is the probabifity of i) 8 sucess ii) At least 6 sucess O OR
Q4) a) Weights of 4000 students are found to be normaily distributed with mean 50 kg and standard deviation 5 kgs . Find he number of students with weights i) less than $45 \mathrm{kgs} \mathrm{ii)}$ between 45 to 60 kgs (ffor standard normal distribution $z$ area under the curve between $\mathrm{z}=0$ to $\mathrm{z}=1$ is 0.3413 and that between $\mathrm{z}=0 \cdot \mathrm{to} \mathrm{z}=2$ is 0.4772 )
b) If $10 \%$ bolts produced by a machine are defective. Determine the probability that out of 10 bolts choesen at random.
i) two will be defectiरe
ii) at most two will be defective.
c) In a continuous distumbution density function $f(x)=k x(2-x), 0<x<2 \infty$ Find the value of $k$, hean and variance.

Q5) a) Random sample of 400 men and 600 women were asked whether they would have a school near their residence 200 men and 325 -women were in favour of proposal. Test the hypothesis that the preportion of men and women in front of proposal is same at $5 \%$ reyel of significance. (Given $\mathrm{Z}_{\alpha}=1.96$ at $5 \%$ l.o.s)
b) The values given below are
i) Observed frequencies of a distribution
ii) The frequencies of a normal distribution having same mean, standard deviation and the total frequency as in a) apply $\chi^{2}$ test of godness of fit.

| a) | 1 | 5 | 20 | 28 | 42 | 22 | 1.50 | 5 | 2 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| b) | 1 | 6 | 18 | 25 | 40 | 25 | 1.8 | 6 | 1 |

(Given $\chi^{2}=12.592$ at $5 \%$ l.o.s.a)
c) Fertilizers A and B are tried respectively on 10 and 8 randomly choosen experimental plots. The yields in the plots were as given below. Test using t-test whether in effects of the fertilizer as reflected in the mean yields.

| Fertilizers | OYields |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| A |  | 7.6 | 8.2 | 7.8 | 8.3 | 8.4 | 8.2 | 7.8 | 7.1 | 8.0 |
| B | 7.4 | 8.1 | 7.6 | 8.1 | 7.5 | 7.6 | 7.3 | 7.2 | - | - |

(Given $t_{0.05}=2.201$ vat d.o.f 16 )

Q6) a) The/averagermarks in mathematics of a sample of 100 students was 51 with S.D of 6 marks. Could this have a randomsample from the population with average marks 50?
(Given $\mathrm{z}_{\alpha}=1.96$ at $5 \%$ 1.o.s.)
b) A Coin is tossed 160 times and following are expected and observed frequencies for number of heads.

| No of heads | 0 | 1 | 3 | 3 | 4 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Expected <br> frequency |  | 2 | 2 | 31 | 6 |
| Observed <br> frequency | 10 | 40 | 60 | 40 | 10 |

Find the $\chi^{2}$ value.
c) In two independent samples of size 8 and 10 the sum of squares deviations of the values form the respective sample means were 84.4 and 102.6. Test whether the difference of variances of the population is significant or mot.
(Given $\mathrm{F}_{0.05}=3.29$ at degrees of freedom $(7,9)$ )

Q7) a) State and prove Neyman-pearson Fundamental lemma.
b) Let p is the probability that a given diéshows neven number. To test $\mathrm{H}_{0}: \mathrm{P}=\frac{1}{2} \mathrm{Vs} \mathrm{H}_{1}: \mathrm{P}=\frac{1}{3}$ following procedure is adopted. Toss the die twice and accept $\mathrm{H}_{0}$ if both times. It shows even number. Find the probabilities of Type I and Type II eroer.

Q8) a) For distribution
$\mathrm{df}=\left\{\begin{array}{cc}\beta e^{-\beta(x-\gamma)} d x, & x \geq \gamma \\ 0 & x<\gamma, \Omega\end{array}\right.$
Show that for $\beta=\oiint_{0}=\gamma=\gamma_{0}$ and $H_{1}: \beta=\beta_{1}=\gamma=\gamma_{1}$ is the best critical region is given, by
$\bar{x}=\frac{1}{\beta-\beta_{9}}\left\{\gamma_{1} \beta_{j}-\dot{\gamma_{0}} \beta_{0}-\frac{1}{n} \log k+\log \frac{\beta_{1}}{\beta_{0}}\right\}$
b) Write short notes on :
i) Critical region and Most powerful critical region.
ii) Level of significance and power of Test.
