T.E. (Electrical Engineering) (Insem)
ELECTRICAL INSTALLATION, DESIGN AND
CONDITION BASED MAINTENANCE
(2019 Pattern) (Semester - I) (303144)

Time : 1 Hour]

[Max. Marks : 30

Instructions to the candidates:

- 1) *Solve Q1 or Q2, Q3 or Q4.*
- 2) *Figures to the right indicate full marks.*
- 3) *Neat diagrams must be drawn wherever necessary.*
- 4) *Assume suitable additional data, if necessary.*
- 5) *Use of non-programmable calculator is allowed.*

- Q1)** a) Explain in details design considerations of Distribution feeder. [7]
b) A single phase distributor AB has $R = 0.2\Omega$ and $X = 0.3\Omega$, at far end B. The voltage V_B is 240 V and current 100 A at pf 0.8 lagging. At mid-point current is 100A at 0.6 pf lagging w.r.t. to voltage V_A at A. Find supply voltage and phase angle between V_A and V_B ? [8]

OR

- Q2)** a) Explain the difference between overhead Transmission line and Underground Transmission line based on volume of conductor? [7]
b) State and prove the Kelvin's Law for feeder design reference to supply system. State its 3 limitations? [8]

- Q3)** a) Write the substation equipments their locations and functions. [7]
b) State the types of Bus bar systems and explain duplicate bus bar system with diagram. [8]

OR

- Q4)** a) Explain the Indian Electricity Rules for Earthing. [7]
b) Explain Plate Earthing with neat diagram. [8]
